Kirk Rice 6 - GBP

Model Factsheet

30 Apr 2026

Disclaimer: Data Sources: Bloomberg L.P. and Collidr. This report was produced by Collidr Research ("Collidr") on behalf of Kirk Rice LLP. The information contained in this report is for illustrative purposes only and should not be construed as a solicitation nor offer, nor recommendation to acquire or dispose of any investment. Specifically the share class used to create the illustrations may not be available on all platforms, nor be suitable for individual investors. While Kirk Rice & Collidr uses reasonable efforts to obtain information from sources which it believes to be reliable, Kirk Rice & Collidr makes no representation that the information or opinions contained in this report are accurate, reliable or complete. The information and opinions contained in this report are provided by Kirk Rice & Collidr for professional clients only and are subject to change without notice. You must in any event conduct your own due diligence and investigations rather than relying on any of the information in the report. All figures shown are bid to bid, with income reinvested. Model returns are calculated using the most appropriate share class of the underlying funds, having regard to the illustrative nature of the report, with all income being reinvested. As a result, real portfolio performance may vary from model performance. Where model portfolio histories are shorter than three years, model returns prior to the portfolio inception date utilise data from a Collidr performance benchmark. Benchmarks are constructed either from the average returns of all Collidr portfolios with similar risk profiles that existed during that time or, for passive portfolios, a single equivalent Collidr passive portfolio. The model ongoing charge and the historic yield figures, where shown, are illustrative and calculated using the weighted average of the ongoing charge figures and historic yield figures (prevailing 12 months) available for the underlying funds from the time of the model inception or, where relevant, the latest model rebalance date. The ongoing charge figure does not include any further charges that an individual investor may need to pay in order to access the model. The value of investments and the income from them can go down as well as up and past performance is not a guide to the future performance. Collidr and Collidr Research are trading names of Collidr Technologies Limited, registered in England and Wales No. 09061794. Registered office: Adler House, 35-36 Eagle Street, London, WC1R 4AQ, UK.
Kirk Rice LLP which is authorised and regulated by the Financial Conduct Authority (registered number 531538) and is registered in England and Wales (registered number OC354936). Registered office: The Courtyard, High St Ascot, SL5 7HP.

1. Description

RISK PROFILE KIRK RICE 6 Ongoing charge 0.35%

Medium/High Risk:

- **prepared to accept periods of negative returns**
- **capital preservation not a priority**
- **protect value from inflation over 7-year periods**

To deliver capital growth to protect value from inflation over 7-year periods. The portfolio may also benefit from an ability to focus on capital preservation in adverse market conditions.

Assets can include Equities; Fixed Interest Securities; options and derivatives. These may be in UK, Overseas and Emerging Markets. Currency exchange rates will impact the returns.

Capital will be at risk, and you may get back less than you invested particularly if you surrender the investments early.

BEHAVIOUR

Suitable for people who:

May describe themselves as Medium to High-Risk takers.

Would like to benefit from long term investment returns that seek to protect the value of money from inflation, aware of stock market volatility and seeking to benefit from the greater rewards available over the long term.

Have a need for growth and/or income.

Understand they may not get back the amount invested and can accept the value will rise and fall.

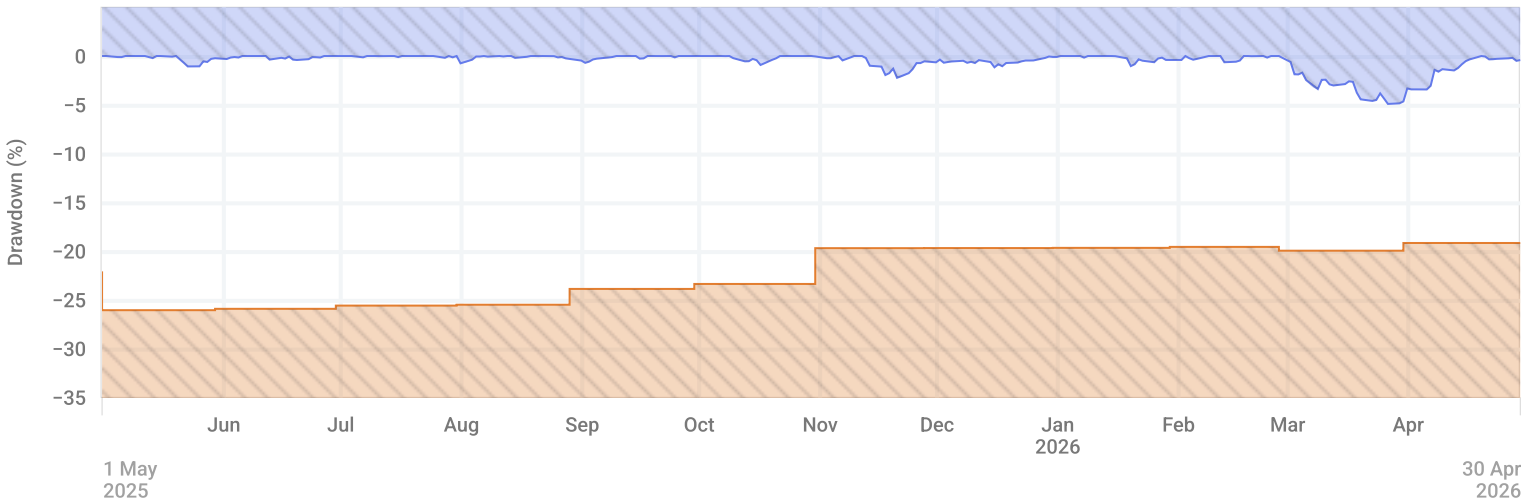
STRESS TEST DRAWDOWN (%) 1 May 2025 - 30 Apr 2026



Stress test notes

The chart shows the calculated drawdown over a trailing 12-month period. The Review Point is a potential intervention point. Any drawdown above this line indicates a typical drawdown in a normal market cycle. Should the drawdown exceed the Review Point, then this indicates that market conditions may be abnormal. This is the point at which immediate action should be considered.
